

A unique driving and drifting experience

Ice Driving Canada will begin its driving and drifting season on January 7th on the majestic lake of Hotel Sacacomie located in Saint-Alexis des Monts in Mauricie area between Montreal and Trois-Rivieres. Unique in North America, the driving programs on a frozen lake are geared towards performance and speed and featured personalized coaching. These extremely safe programs are designed for both amateur and experienced race drivers. 'Our programs similar to what you can find in Scandinavia are even more attractive this year since we are using Porsches Boxster fitted with tires that are equipped with 400 studs each,' says Jean-Sébastien Sauriol, founder and chief-instructor of Ice Driving Canada.

Ice Driving Canada programs are being offered until March, for more information and reservations please consult our new website at www.icedrivingcanada.com
